Expanding Access to Care through Mid-Level Oral Health Practitioners

The American Dental Hygienists’ Association (ADHA) is leading the transformation of the dental hygiene profession to improve the public’s oral and overall health.

Dental hygienists are formally educated and licensed by each state and are poised to help prevent oral health diseases. ADHA is committed to working on the development and implementation of new workforce models.

A 2014 report on expanding the provision of affordable preventive services outside dentists’ offices from the National Governors Association noted that states have looked into altering supervision or reimbursement rules, as well as creating professional certifications for advanced-practice dental hygienists. To date, studies of pilot programs have shown safe and effective outcomes.¹

Currently, 40 states allow dental hygienists to initiate patient care in a setting outside of the private dental office without the presence of a dentist. These policies enable dental hygienists to practice in community settings and reach a variety of patient populations.

ADHA policies highlight the association’s flexibility in considering various dental hygiene-based models as well as ADHA’s commitment to the development of providers who are appropriately educated and personally committed to deliver safe, quality oral healthcare to those in need.

Maine, Minnesota and Vermont, as well as tribal lands in Alaska and Washington, have moved forward to address their access to care challenges and now recognize dental therapy as a viable model.

ADHA supports oral health care workforce models that culminate in:

- Graduation from an accredited institution
- Professional licensure
- Direct access to patient care

Mid-level Oral Health Practitioner:

A licensed dental hygienist who has graduated from an accredited dental hygiene program and who provides primary oral healthcare directly to patients to promote and restore oral health through assessment, diagnosis, treatment, evaluation, and referral services. The Mid-level Oral Health Practitioner has met the educational requirements to provide services within an expanded scope of care and practices under regulations set forth by the appropriate licensing agency.

ADHA is committed to advocating in support of new dental hygiene-based models for oral health care for many reasons:

1. The dental hygiene workforce is ready and available; there are currently 185,000+ licensed dental hygienists in the United States.
2. The educational infrastructure is developed; there are over 300 entry-level dental hygiene programs
3. The public will benefit from providers with a broad range of skills sets which include preventive and limited restorative services.

### States with Mid-Level Oral Health Care Workforce Models

**Minnesota: Advanced Dental Therapist, (Signed into Law, 2009)**
- Education – Masters degree
- May be dually licensed as a RDH and ADT
- ADT services can be provided under general supervision
- An ADT may perform all the services a dental therapist provides and the following procedures, pursuant to a written collaborative management agreement with a dentist:
  - Oral assessment and treatment planning.
  - Routine, nonsurgical extractions of certain diseased teeth.

**Maine: Dental Hygiene Therapist, (Signed into Law, 2014)**
- Education – RDH + post-secondary dental therapy program
- Preventive and restorative scope
- Licensure required
- Direct supervision by a licensed dentist and a written practice agreement is required
- Dually licensed as DHT and RDH
- ADTs may be dually licensed as RDHs

**Vermont: Dental Therapist (Signed into Law, 2016)**
- Education – RDH + CODA-approved dental therapy education program
- General supervision by a licensed dentist and collaborative agreement is required
- Preventive and restorative scope
- Licensure required
- Must be dually licensed

### States Pursuing Mid-Level Oral Health Care Workforce Models

**Connecticut: Advanced Dental Hygiene Practitioner**
- Education – RDH + master’s degree
- Preventive and restorative scope
- Licensure required
- Must be dually licensed

**Kansas: Dental Therapist**
- Education – Board-approved dental therapy education program
- Preventive and restorative scope
- Licensure required
- May be dually licensed

**Maryland: Dental Therapist**
- Education – CODA-approved dental therapy education program
- Preventive and restorative scope
- Licensure required
- Must be dually licensed

**Massachusetts: Advanced Dental Hygiene Practitioner**
- Education – RDH + 12-18 month registered dental practitioner education program
- Preventive and restorative scope
- Licensure required
- Must be dually licensed

**Michigan: Dental Therapist**
- Education – CODA-approved dental therapy education program
- Preventive and restorative scope
- Licensure required
- May be dually licensed

**New Mexico: Dental Therapist**
- Education – RDH + CODA-approved dental therapy education program
- Preventive and restorative scope
- Licensure required
- Must be dually licensed

**North Dakota: Advanced Practice Dental Hygienist**
- Education – RDH + Advanced Practice Dental Hygiene education program
- Preventive and restorative scope
- Licensure required
- Must be dually licensed

**Ohio: Dental Therapist**
- Education - CODA-approved dental therapy education program
- Preventive and restorative scope
- Licensure required
- May be dually licensed

**Washington: Dental Hygiene Practitioner**
- Education – CODA-approved dental therapy education program
- Preventive and restorative scope
- Licensure required
- Dual-licensed
